

IPA SITE TOUR

SINIAT (ETEX AUSTRALIA)

Manufacturing Excellence

HOST PRESENTER

Greg Bartlett

Plant Manager
Siniat (Etex Australia)

During this event, you will:

- Gain an understanding of the site processes and constraints.
- Discover their manufacturing excellence journey.
- See examples of visual management.
- Understand the product flow and critical aspects.
- Have time to review and ask questions.

Siniat is one of the Etex Group's flagship commercial brands. In Australia, their plasterboard is manufactured in their factories in Matraville (Sydney, NSW), Altona (Melbourne, Vic), and Bundaberg (Qld).

In June the Matraville site flicked the switch on their new 962kW solar energy system, again demonstrating their progressive approach to sustainable energy practices and manufacturing excellence.

Join us for a unique opportunity to see their manufacturing excellence and visual management in action.

Secure your spot now for an insider's look at the forefront of Australian manufacturing.

 Tuesday, 20th August 2024
